

Notes from MN Nursing Community Policy Forum January 16, 2020

AGENDA

- ▶ Welcome and Check In
- ▶ Revisit Purpose and Collective Impact
- ▶ Selected Primes to Support Collective Impact Learning
- ▶ Current Minnesota Principles and Endorsements
- ▶ Consideration of Nursing Now Principles
- ▶ Develop a 2020 Legislative Scanning, Evaluation and Political Action Process
- ▶ Next Meeting ?

Review of the Principles of Collective Impact and its importance to the Nursing Community

ESSENTIAL MIND SHIFTS FOR COLLECTIVE IMPACT

Get all the right eyes on the problem

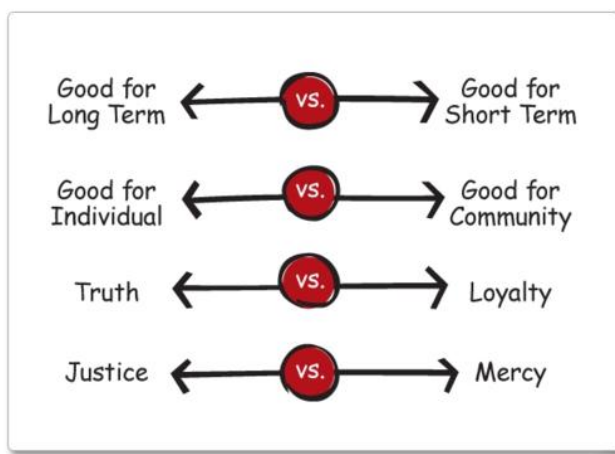

The relational is as important as the rationale

Pay attention to adaptive work and not just technical solutions

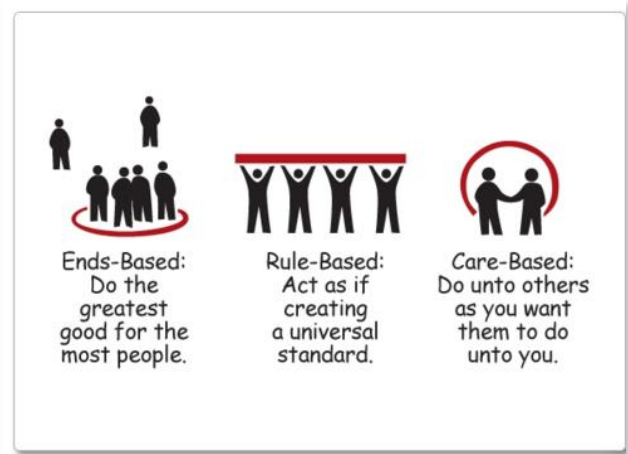

Kania, J., Hanleybrown, F., & Splansky Juster, J. (2014). Essential mindset shifts for collective impact. *Collective Insights on Collective Impact*, 2-5.

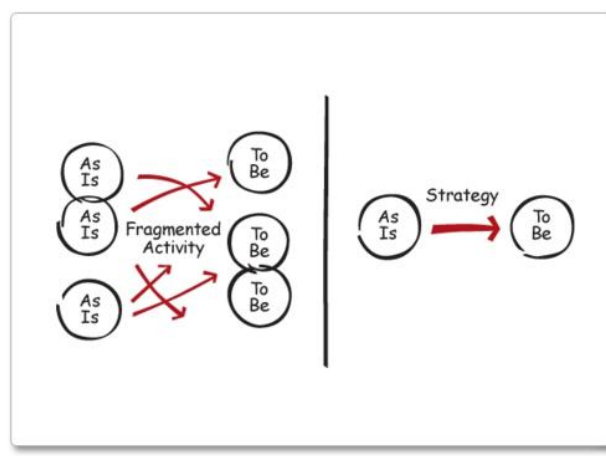

The PRIMES are universal patterns of group behavior that outfit you to work with any group to solve any problem - **especially the big ones.** Attendees watched and discussed these Primes videos.

<https://theprimes.com/right-vs-right>

<https://theprimes.com/resolution-principles>

<https://theprimes.com/cohesion>

Attendees discussed the refined MN Nursing Community Policy Forum Principles and talked about next steps.

1. Minnesotans should have access to affordable high-quality healthcare.
2. Addressing mental health and suicide prevention are crucial to the wellbeing of Minnesotans and our state.
3. Access to high quality healthcare should be supported and improved for Minnesotans living in rural communities.
4. All students should have access to on-site school health services.
5. Minnesota should address gun safety and prevention of gun violence as public health issues.
6. Healthcare workers should be able to practice in setting that are safe and free from violence.

These Principles have been supported by the boards of directors of the following organizations as of 1/16/2020:

- MN NACNS
- MNORN
- MOLN
- NAPNAP
- SNOM

Next steps:

- Additional organizations can support
- Sue Stout will take the lead on developing a one-page flyer for policymakers and others to communicate these principles

Next, attendees discussed the NursingNow global principles, that seek to raise the profile of nursing throughout the world

1. Establish more nurse-led clinics, enabling nurses and midwives to work to their full potential.
2. Employ more specialist nurses in all areas of care.
3. Make comprehensive midwifery services available everywhere, offering a full range of maternal and newborn health care.
4. Make nurses central to primary health care providing services and supervising community health workers
5. Support nurses and midwives to deliver health promotion and disease prevention.

Our discussion about how these principles might apply to Minnesota focused on Goals 1 & 4, with their emphasis on nurse-led clinics and primary care. The comment was made that we need to ensure that nurses are central to primary care.

Participants were encouraged to bring these Goals back to their organizations to begin discussions. We will discuss at the next Nursing Community Policy Forum meeting.

Legislative Scanning for the 2020 MN Legislative Session:

Issues for the 2020 Legislative Session:

- MN APRN Coalition:

SF 1966, authors Kiffmeyer, Marty, Eaton, Abeler, Rosen; HF 1914, authors Edelson, Pierson, Albright, Bahner. APRNs added to certain statutes. Discusses as a clean-up bill to have consistency with current practice. Adds APRN signature in multiple sections (125 pages) . Does not expand scope. No fiscal note. This addresses statutes only, will work on rules in the future.

- MNA:

Workplace Violence Prevention: may try to add language to the 2015 Bill

- SNOM:

Medication destruction bill: SF 247, authors Pratt, Clausen, Rosen, B. Anderson. HF 575, authors Huot, Haley Erickson Morrison, Davnie. Unclaimed drugs or medications in schools disposal provided. No fiscal note, has bipartisan support. Does not include controlled substances. Will go as a stand-alone. SNOM noted that over 1/3 of the schools in the state have no school nurse, that there is no consistency in the state.

- NAPNAP talked about Celebrate Immunization MN rally at the Capitol on February 18th from 11-11:30 in the Rotunda. Hoping for a large group. More information can be found on the Immunization Coalition Facebook page

- Other discussion:

CBD/medical cannabis in schools, there is some activism around this issue. Only one school in Colorado currently allows

Sen. Chris Eaton still working on MN End-of-Life Option Act

NAMI-MN working on 253B, commitment in mental health

Sue Stout volunteered to create a listserv for Policy Forum communication during the legislative session.

Next meeting May 21st at 4PM. Location TBD.
